

## **CLAIMS**

Claim 1-6 (canceled)

Claim 7 (new): I claim, in an eraser structure, comprising:

A box hollow case including several mounting holes on the said case sides, a brush which is roughly same dimension as said case and is fastened on the bottom of the said case, a soft material pad ring, two rollers, two shafts which are inserted into the center holes of said rollers and through said case holes, an U shaped bracket which is bolted to the said case, an eraser circle fabric and a vacuum connector which is connected to a vacuum device.

Claim 8 (new): The eraser structure of claim 7 wherein said a soft material pad ring is installed around the edge of said case in order to obtain the optimum vacuum force via said vacuum connector.

Claim 9 (new): The eraser structure of claim 7 wherein said bracket is to combine said eraser circle fabric which is mounted on the said roller and said roller which is mounted on the front and back of the said bracket into one set.
